

Appleby Parish Council Environment Policy Statement

Appleby Parish Council is committed to protecting our environment and we aim to re-cycle, re-use and re-purpose our waste

To achieve this, we will:

- Strive to prevent, eliminate and reduce waste and pollution by recycling and reusing materials wherever possible
- When carrying out projects we will consider our impacts on the Environment and take steps to reduce negative ones and promote positive activity.
- Conserve natural resources and strive to reduce material and energy consumption.
- When purchasing, consider the supply chain from which it comes.
- Consider the guarantees and warranties on purchases when selecting products to lengthen the product life and positively impact the need to replace, accepting that this will not always mean buying the cheapest.
- Comply with all applicable statutory and regulatory requirements.
